# Social Booth Settings - Video

Modified on: Mon, 14 Mar, 2016 at 1:43 PM

(http://imgur.com/cXnuKGl)

1. **Enable Video**
   Allow the user to select to record short video clips.

2. **Video Camera Selection**
   Select DSLR or Webcam to record video.

Note: DSLR video will only work with select Canon Camera which are listed right under the DSLR selection button.

3. **Seconds**
    The number of seconds of video to record.

4. **Enable Video Overlay**
    Add an overlay to the video. This will need to be a 600x400 PNG-24. If you design smaller you will need to set the size and placement here.

5. **Overlay Image**
    Select the image file you want to overlay the video.

6. **Video Only Mode**
    Checking this will turn Social Booth into a Video only Booth, disabling Photo Mode.

7. **Ask for Video after Photo Session**
    Enables a pop up question at the end of each photo session asking if they want to record a video too.

8. **Question**
    Change the wording of the question pop up asking for a video after the photo session.

9. **Enable Slow Mo (DSLR Cameras Only)**
    Enable the slow motion processing of each video session.

10. **Speed**
    Choose the slow motion speed of the video processing.

Note: Slower computers don't perform well recording video. Processing times can be quite slow and audio frequently can get out of sync with an underpowered PC

Note: Video can be uploaded to Facebook and Twitter as well as Emailed. Video can't be sent via SMS and SMS will be disabled when the user selects a video.
